DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method for job-based management of a business, classified in class 705, subclass 30.
 - II. Claims 12-19, drawn to a job-based method for managing business resources, classified in class 705, subclass 34.
 - III. Claims 20-22, drawn to a method for providing a real-time financial account, classified in class 705, subclass 36.
 - IV. Claims 23-30, drawn to a computer implemented method for virtual accounts including purchase orders, classified in class 705, subclass 26.
 - V. Claims 31-33, drawn to a computer implemented method for budget management of a business, classified in class 705, subclass 39.
 - VI. Claims 34-40, drawn to a method specifying virtual accounts, classified in class 705, subclass 36.
 - VII. Claims 41-51, drawn to a computer data signal, classified in class 713, subclass 190.
 - VIII. Claims 52-56, drawn to a system, classified in class 709, subclass 203.
 - IX. Claims 57-65, drawn to a computer readable medium, classified in class 700, subclass 214.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, IV, V, VI and VII, VIII and IX are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Group Inventions I, II, III, IV, V, VI do not require a carrier wave as recited in Group VII, a networked computer type devices, nor a computer readable medium.
3. Inventions Group I and II, III, IV, V, VI are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful as an automated invoice or point-of-sale device and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for either Groups II, III, IV, V, VI, VII, VIII or IX, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. A telephone call was made to Michael F. Krieger, Esq. (Reg. No. 35,232) on Monday, December 29, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Krieger requested the restriction be mailed due to the number of proposed restriction Groups.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Applicant's two separate Information Disclosure Statements (IDS's) were received on September 19, 2001 and January 21, 2003. These IDS's will be reviewed in due course.

10. Applicant's Amendment received September 25, 2001 has been entered. It is noted that Applicant's Declaration does not reflect the above noted Amendment.
